SUMMARY

Full Stack Developer with 1+ years of experience building scalable web, mobile, and enterprise SaaS platforms using React, Node.js, TypeScript, and PostgreSQL. Skilled in Clean Architecture API design, AI/LLM integration via OpenAI SDK, LangChain, and Model Context Protocol (MCP).

EDUCATION

University of Karachi (UBIT)
Bachelor of Science in Computer Science

Karachi, Pakistan
Dec 2022 – Dec 2026

WORK EXPERIENCE

Full Stack Developer

Sparktrum

Jan 2025 – Present
Karachi, Pakistan (Hybrid)

- Engineered 3+ production web and mobile apps using React, React Native, Expo, and Next.js, serving 10,000+ monthly active users across iOS, Android, and Web.
- Architected real-time backend services and REST APIs with Node.js, Express.js, Supabase, and PostgreSQL, with JWT/OAuth2 authentication and role-based access control, supporting 5+ concurrent client tenants.
- Developed an AI-powered customer support system using Python and OpenAI Agents SDK, streamlining 100% of first-response interactions across Facebook, Instagram, and WhatsApp, cutting average first-response time by 80%.

Frontend Developer Intern

CodeAlpha

Dec 2023 – Feb 2024
Remote

- Translated Figma mockups into pixel-perfect, responsive React.js components using Tailwind CSS, delivering 5+ features across 5 sprints within a 3-month internship.
- Integrated REST APIs and optimized component rendering, cutting unnecessary re-render frequency by 30% and improving average page load performance by 25%.

PROJECTS

Enterprise SaaS Platform for IT Infrastructure Monitoring | TypeScript, Node.js, Python, AWS

2025 – Present

- Architected a multi-tenant REST API platform with 51+ modules using Clean Architecture (Controller/UseCase/Repository) in TypeScript and Node.js, reducing new-tenant onboarding time by 40%.
- Built and maintained a PostgreSQL schema across 627+ migrations with connection pooling, query streaming, and index optimization; cut test setup time from 60s to under 2s via schema snapshots — a 97% reduction.
- Built Python tools with LangChain and MCP (Model Context Protocol) for LLM-powered workflows; leveraged AWS (Lambda, SQS, S3, Bedrock) for event-driven processing, handling 1,000+ daily automation events.

AI Customer Support Automation Platform | Python, Expo, Supabase, PostgreSQL, OpenAI SDK

2025 – Present

- Handled 100% of first-response interactions using AI chatbots via OpenAI Agents SDK across 3 social platforms (Facebook, Instagram, WhatsApp) through webhook pipelines, reducing manual triage workload by 90%.
- Built a unified real-time dashboard for ticket management with intelligent routing, tracking, analytics, and knowledge base integration, used by 3+ support teams simultaneously.

Centralized IAM Platform | Python, React, Docker, PostgreSQL, OAuth2, RBAC

2025

- Implemented centralized authentication and authorization across 4+ applications using OAuth2, JWT, and RBAC; containerized with Docker for consistent deployment, eliminating per-app auth duplication.

Project Management Web Application | MongoDB, Express.js, React.js, Node.js (MERN)

2024

- Built a full-stack MERN app with real-time WebSocket collaboration, JWT authentication, dynamic task management, and role-based team workflows, supporting teams of up to 20 concurrent users.

SKILLS

Frontend: React.js, Next.js, React Native, Expo, TypeScript, JavaScript (ES6+), Tailwind CSS, Redux

Backend: Node.js, Express.js, Python, REST APIs, JWT, OAuth2, RBAC, MFA/TOTP, AES-256, Rate Limiting

Databases: PostgreSQL, MongoDB, Supabase, Redis, Sequelize ORM, Knex.js

AI & MCP: OpenAI Agents SDK, LangChain, AWS Bedrock, Model Context Protocol (MCP), Prompt Engineering

Cloud & DevOps: AWS (Lambda, SQS, S3, RDS, EventBridge), Docker, CI/CD, Serverless Framework, Vercel, Git

Testing & Tools: Jest, Integration Testing, Postman

CERTIFICATIONS

Panaversity: Prompt and Context Engineering — Effective AI Communication (AI-101)

Panaversity: AI-Driven Development with Python and Agentic AI (AI-201)
